

property owned by the United States to another Federal agency, military department or a state must be reported to the Committees on Armed Services of the Senate and House of Representatives if the estimated value is more than \$50,000 and the transaction may not be consummated until after 30 days have expired from the date the report is submitted to the Committees. Title 10 U.S.C. 2663 provides for acquisition by the Secretary of a military department during time of war or when war is imminent of any interest in land, including temporary use, required for a Defense installation, munitions plant or power plant for production of munitions, through negotiation and purchase, by condemnation or by gift. Title 10 U.S.C. 2672 provides that the Secretary of a military department may acquire any interest in land, including temporary use, by gift, purchase, exchange of United States owned land or otherwise, that he or his designee determines is needed in the interest of national defense and does not cost more than \$50,000 exclusive of administrative costs or the amounts of deficiency judgments.

(3) *Civil works.* Acquisition of real property for civil works projects for which provision has been made by law is authorized in 33 U.S.C. 591-595a and 701. As in the case of military projects, the Secretary of the Army is also authorized to accept donations of lands and materials required for civil works projects.

(c) *Rights-of-entry.* Rights-of-entry for construction may be obtained by the Division or District Engineer, after he has been authorized by the Chief of Engineers to acquire the land, pending completion of acquisition by purchase or the filing of condemnation proceedings with declaration of taking. In the event the landowner will not voluntarily grant a right-of-entry, an appraisal of the required interest should be made and negotiations conducted on the basis thereof. If the negotiations are not successful, a declaration of taking should be submitted to acquire the necessary rights. The same procedure will be used for acquiring rights-of-entry for other purposes, such as survey and exploration.

§ 644.82 Prerequisites to acquisition.

(a) *Authority to begin acquisition.* Action to acquire a tract of land will not be initiated until the Real Estate Design Memorandum (for all projects except military) or Real Estate Planning Report (for Army, other than Civil Works, and Air Force projects) is approved and specific authorization of the Chief of Engineers, or the appropriate Air Force Regional Civil Engineer (AFRCE), to proceed with the acquisition of the project is received by the Division and District Engineer and funds have been made available. Upon such approval, the Division or District Engineer is authorized to initiate action for the acquisition of the estate approved for the particular project in accordance with the procedures herein-after set forth.

(b) *Tract description.* Authority to initiate engineering planning of a project will state the mapping procedures provided for in Chapter 3, ER 405-1-12. It is necessary that land requirements be determined, that the various tracts be identified by ownership, and that accurate tract descriptions be developed. Tract ownership data may be developed by Division or District personnel from the local land records or procured by contract from a qualified local Government official, abstractor or title company representative.

(c) *Title evidence.* With approval to proceed with acquisition, title evidence contracts can be initiated. The procedures for obtaining title evidence are covered in §§ 644.61 through 644.72. Preliminary title evidence to confirm ownership and status of the title is prerequisite to negotiating for acquisition of the land or interests therein.

(d) *Appraisals.* Concurrently with the procurement of title evidence, the appraisal of the land should begin. The appraisal, when approved, forms the basis for the determination of fair market value which will not be less than the approved appraised value. The appraisal procedures are covered in subpart B. Normally, one appraisal per tract (ownership) will be obtained; however, in unusual cases such as those which involve novel, unique or controversial appraisal concepts, there is no objection to obtaining more than one appraisal covering the same tract

§ 644.83

if considered advisable by the Division or District Engineer. When fee tracts are acquired by eminent domain procedures, where the value of the property is between \$50,000 and \$100,000, only one appraisal need be provided to the Department of Justice so long as it is a contract appraisal; two appraisals will be provided for values exceeding \$100,000. Easement tracts acquired by eminent domain procedures, in excess of \$50,000, will require two appraisals. At least one of the two appraisals must be made by a contract appraiser. Generally, in these cases, the second appraisal is procured only after negotiations indicate that agreement on price cannot be reached and that acquisition by condemnation will be required. The second appraisal will be procured in order that the Corps can take advantage of any negotiating flexibility that the second appraisal may afford in order to preclude court action. It is also necessary that the appraisals be relatively current in point of time (not to exceed six months) since dependent upon the real estate activity and degree of stability of the local economy, significant changes may take place in relatively short periods of time.

(e) *Environmental considerations.* Paragraph D3, Attachment 1 to Enclosure 1, DOD Directive 6050.1, dated March 19, 1974, subject: "Environmental Considerations in DOD Actions," requires close environmental scrutiny of real estate acquisitions, disposals and outgrants to determine if said actions constitute a "Major Action Significantly Affecting the Quality of the Human Environment (MASAQHE)." If the action is determined to be a MASAQHE, then an environmental impact statement is required. Paragraph D3 is quoted here for ready reference:

D. Certain types of actions require close environmental scrutiny because of the possibility that they may either affect the quality of the environment or create environmental controversy. It may be desirable in such cases to have a complete presentation of the environmental aspects of the proposed action available for any interested party. For these reasons, consideration shall be given to documenting the environmental effect of the following types of actions in writing: (The written environmental assessment need not be elaborate for actions in which it is readily determinable that the impact

32 CFR Ch. V (7-1-13 Edition)

would not be significant; however, negative declarations must be supported by written environmental assessments which generally meet the EIS format requirements.)

§ 644.83 Negotiations.

(a) *Acquisition objectives.* The objective of a land acquisition program is to acquire land at a price that will afford each landowner his constitutional guarantee of "just compensation" as that term has been defined by Federal judicial decisions. The Government must never pay less than just compensation unless a gift is intended. In eminent domain proceedings, the just compensation due a landowner is determined judicially by court award or by settlement prior to trial; in a purchase case, it is determined by negotiations leading to a satisfactory price and agreement with the landowner. While it is recognized that an appraisal is only an informed opinion and does not establish or determine just compensation, it is also recognized that, in negotiating for the purchase of land, an appraisal is the best and sometimes the only reliable opinion of the market value of the land which is supported by a thorough, acceptable analysis of market conditions at the time of purchase. Therefore, in the negotiation for the purchase of land, an approved current appraisal shall establish the minimum price to be paid for the land being acquired by the Corps of Engineers. Negotiations or offers below this price are prohibited except where the property is being acquired on a competitive basis and condemnation is not authorized.

(b) *Negotiating objectives.* In all cases, it is important that the negotiator receives adequate guidelines and explicit instructions. Promptly, after the amount of the estimated just compensation is established, the negotiator shall make an initial offer in the full amount of the fair market value, shall advise the landowner that the land was appraised for such amount, and shall furnish the landowner a written statement of, and summary of the basis for,
